

Benefits

Veritas WAGAS Electric Plans

REPAIRS

Repairs carried out in the network of official services, authorized by the manufacturer, by trained technicians of the brand.

ADDED VALUE

Protection of the vehicle's performance and resale value.

ORIGINAL PARTS

100% original parts.

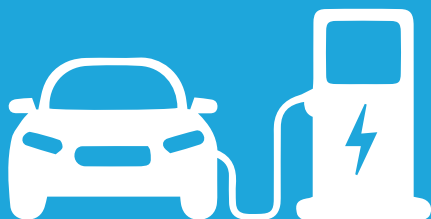

TRANSFERABLE

The warranty can be transferred in case of sale of the vehicle.

OFFICIAL SERVICE GUARANTEE

All procedures and repairs carried out are guaranteed by the official service.

**Please refer to your contract for full details on coverage for each plan.*

Cars have problems

You've made a big investment and decided to go green. But having an electric vehicle can be much more expensive than having an internal combustion vehicle. Also, almost everyone has insurance that protects them in case of an accident.

However, did you know that most people have never used it and will never use it? However, all vehicles (electric or not) will require repairs sooner or later. In the case of electric vehicles, the replacement of their battery can cost the owner several million pesos (in some cases up to 80% of the value of the vehicle). While these are examples of a major repair, minor repairs can also add up to many thousands or millions of dollars over the time you own the vehicle.

The question you need to ask yourself is simple: Do you want to pay for these huge repair costs, or would you rather have someone pay for them? With a Veritas WAGAS EV Plan, the Service Contract will pay for the costs so you don't have to. In many situations, the cost of a single covered repair pays for the entire protection plan.

A mechanical failure or breakdown can be very stressful and not only costs money, but also time and a lot of problems. With a Veritas WAGAS EV Plan, you have someone to call if you ever have a mechanical breakdown or failure. You will have complete peace of mind, knowing that your vehicle is covered by the brand's official service.

**Please see section "WHAT TO DO IN THE EVENT OF A BREAKDOWN" of your contract for full details*

The protection plans are only valid within the Republic of Chile, with the exception of the island territory, excluding the Isla Grande de Chiloé.

Niveles de protección

DRIVETRAIN

Electric battery, electric motor, electric drive motor, electric drive, electric generator, motor controller, electric drive system or transmission, DC/DC converter, power inverter module, electric vehicle control unit (EVCU), electric compressor and on-board charging module. Traditional transmission systems, such as the engine, transmission, drive axles, and transfer case, are also considered. Electric and non-electric superchargers are also covered (provided the applicable option is selected).

DRIVETRAIN DELUXE

Covers all DRIVETRAIN components, plus: cooling system, air conditioning system, electric motors and window lifter, electric door lock actuators, electric trunk switch, electric antenna motor, alternator, voltage regulator, heating fan, starter motor, starter solenoid, starter motor drive.

PREFERRED

Covers all components of the DRIVETRAIN and DRIVETRAIN DELUXE plus: brake system (excluding brake discs, brake pads and other elements contained in "Section V. Exclusions"), steering and suspension systems..

PREMIER

Our best level of coverage, Veritas WAGAS Premier EV Plan covers nearly all mechanical and electrical components of the vehicle. Items that aren't covered are listed in the exclusions section of your contract. For example, common maintenance items such as brake pads and other wear items are excluded from coverage.

Coverage Description

Veritas WAGAS EV Plans are the first Vehicle Protection Program designed exclusively for electric vehicles. In recent years, due to the expansion of electric vehicles in the market, not many offer "electric" protection vehicles. Veritas WAGAS is one of the first companies to offer a Vehicle Protection Program that has EV Plans, specially designed to cover electric vehicles. You decided to help the environment by buying an electric vehicle. Now, you'll have the best possible protection, created specifically for your vehicle.

Our plans are different because:

- Electric vehicles are very complex, each make or model can have a different design and engineering and have different components. With a Veritas WAGAS EV Plan, you will have protection of specific electrical components such as the electric motor, electric generator, motor controller, electric drive system, DC converter, inverter module, and other electrical-only components.
- Globally, we are one of the few able to cover electric batteries and we have removed battery degradation exclusions and will replace it (as long as it has degraded to less than 70% of its capacity).
- We also removed other common exclusions typically found in EV warranties
- We have EV Plans for all electric vehicles on the market that are up to 10 years old and have 200,000 kilometers on their odometer at the time of contracting.

**Note: Available coverage levels vary based on the age and mileage of the vehicle at the time of sale.*

See Service Agreement for a complete list of details and exclusions.
